

The following access program was established under section 15 of the *Act respecting health services and social services* (Compilation of Québec Laws and Regulations [RLRQ], chapter S-4.2), which states that "English-speaking persons are entitled to receive health services and social services in the English language, in keeping with the organizational structure and human, material and financial resources of the institutions providing such services and to the extent provided by an access program [...]". The goal is to ensure that English-speaking persons have access to a range of appropriate and comprehensive health and social services provided in English and located as close as possible to their living environments.
